

Inflammation and Dry Eyes

About

The Regener-Eyes® treatment is a natural biologic developed to help patients suffering from **inflammation and dry eyes**.

The science of regenerative medicine focuses on stimulating the body's own natural ability to heal and regenerate. Regener-Eyes® may offer hope for patients suffering from the signs and symptoms of inflammation and injury. This results in a natural, non-surgical, and long-lasting solution in a simple eye drop form.

Technology

Regener-Eyes® is a sterile, acellular biologic, made from 771 anti-inflammatory cytokines and growth factors, which are necessary for cell function, overall health, and homeostasis. When used daily in an eye drop, these proteins can help to reduce pain and inflammation, and stimulate the body's natural ability to heal, repair, and regenerate. Regener-Eyes® is made utilizing our Sterile D-MAPPS™ platform technology.

How it works

- Anti-inflammatory cytokines help to **reduce inflammation**
- Growth factors aid in **healing, repair, and regeneration**
- Hyaluronic acid helps to **lubricate and protect**

Regener-Eyes® contains **771** naturally occurring **anti-inflammatory cytokines, and growth factors**.

Safety

Regener-Eyes® is a safe and sterile solution prepared by our proprietary patent protected processes to ensure the safety, bioactivity, sterility, and preservation of the product.
